

Does Industrial Sector had spent more on their Total Operations in 2016 than IT

Total operating Expenses of Industries Sector

Here are the histograms of Total Operating expenses spend by Industrial and IT sector companies during the year 2016.

Both are Positively Skewed as their means are greater than their median

The mean for Industrial sector is at \$11.06 billions whereas the mean of IT was at \$13.62 billions. However the median (\$5.65 billions) of the Industrial sector is slightly higher than IT (\$4.96 billions). The standard deviation of IT (\$15.44 billions) is higher than Industrial (\$11.84 billions). That means more than 50% of Industrial sector companies are spending more amount than IT. Though the median is higher, the Industrial sector is less variability as the standard deviation of IT is slightly higher than Industrial sector. The range of Industrial sector (\$33.69 billions) is less than that of IT sector (\$42.86 billions) which means that the IT sector is more volatile and has a greater spread than Industrial sector.

Total operating Expenses of IT Sector
